

There are two versions of the Practice Exam Quiz. The first version is UNGRADED Practice Exam Quiz and provides information about the answers you select and feedback to help you understand what you might need to study. You can try the ungraded version multiple times until you get everything right.

A good way to study is to look up every correct and incorrect answer and make sure you not only know which answer is correct, but also *why* it is correct.

The second version is the GRADED Practice Exam Quiz. This version is more like the actual exam. Because it offers limited feedback – just a total score at the end. When you are ready, proceed to the GRADED Practice Exam Quiz which will give you credit towards completing this course. You may only attempt the GRADED Practice Exam Quiz three times in 8 hours.

Good luck!
