Review of tips

TIP 1: Create your own custom preparation plan using the resources in this course.

TIP 2: Use the Exam Guide outline to help identify what to study.

TIP 3: Product and technology knowledge.

TIP 4: This course has touchstone concepts for self-evaluation, not technical training. Seek training if needed.

TIP 5: Problem solving is the key skill.

TIP 6: Practice evaluating your confidence in your answers.

TIP 7: Practice case evaluation and creating proposed solutions.

Tip 8: Use what you know and what you don't know to identify correct and incorrect answers.

Tip 9: Review or rehearse labs to refresh your experience

Tip 10: Prepare!

Good luck!!
